

REDDER MOON

Electronic Darkwave Art Pop | Kansas City

Analog synths, dark dance beats, dreamy guitars, and soft vocal melodies evade time and move between genres. The moon becomes more red on the lunar eclipse and this inspires our living soundtrack.

Music Recorded in Isolation. The band was created of sheer necessity to express the gloom of the age. Consisting of members Jeremiah James Gonzales, Brody Lowe and Jill McKeever, who came together in 2020 and recorded dozens of songs. Isolated in home recording rooms, sent digital audio tracks back and forth, finding a crazed workflow of creative refuge. Jill happened to track the vocals for the song "Hell is Other People" during the insurrection on Jan 6th, and this Sartre quote became the title of the finished album.

The upcoming album has a dark post punk vibe with unexpected twists that make the genre difficult to pin down. Darkwave turns to shoegaze with little dance and a little hip hop elements woven in. It is overall a slower tempo and a darker and more melancholy mood than the EP Land of the Blind, but no less cynical in theme. From the title "Hell is Other People" to the sentiment "We're like dominoes in slow motion" and "...wasn't he into those filtered internet girls?". This album was no doubt written in 2020.

HELL IS OTHER PEOPLE
