

Moody. Driving. Buoyant. Synth and sass. Brooklyn synthpop outfit **The Mystic Underground** return to prove that electronic music can be thought-provoking, immensely compelling and seductively danceable thus creating an intoxicating sound.

Inheriting a love of classic alternative bands such as the Smiths, David Bowie and New Order fused with a love of Britpop, dance and industrial, The Mystic Underground are quite the eclectic duo comprised of singer/songwriter Vladimir Valette and keyboardist/producer Benedetto Soggi. Finding their way in the early days of the last decade, the band would soon forge their identity in the international synthpop community at large. The duo's last album, 2020's "Wrapped In Riddles" was released to great acclaim from several prominent synthpop blogs like Post-Punk.com, Side-Line and Synthpop Fanatic whilst also receiving substantial play on internet and college radio.

A new year in 2023 brings new perspectives, new hopes, new beginnings. It also will bring a new record. As yet untitled, the new full-length will continue the band's mission to fill the dancefloor, storm the charts, move the feet and touch the heart.

"Life... set to a dance beat"

'digital by the mystic underground

[The Mystic Underground – Digital \(Unlisted Official Music Video\)](#)

“Digital is a tune that was imagined as a bit of a groovy number that channeled some of our influences in Detroit House and stuff like Lisa Stansfield, Cathy Dennis or the Pet Shop Boys etc.. I don’t think we’d ever gone down this road previously but it’s always been our aim to try to keep people guessing and more importantly to keep ourselves of the mind of pushing things forward. The best way to describe Digital from a lyrical standpoint would be the sound of feeling lovestruck and lovelorn and how that translates into the lengths we go to in order to fill the void in the new Roaring Twenties as it were.” -Vladimir Valette
